RESEARCH INTERESTS

QUANTUM INFORMATION THEORY | QUANTUM COMPLEXITY | COMPLEXITY THEORY | INFORMATION THEORY

EDUCATION

CURRENT	Dual-Degree (BTech+MTech)	INDIAN INSTITUTE OF TECHNOLOGY, KHARAGPUR MAJOR: Electronics & Electrical Communication Engineering MINOR: Computer Science Engineering 🏆 *Best bachelor thesis 2021*	9.24/10 (CGPA) 9.16/10 (Minor GPA)	
APRIL 2017	TSBIE	FIITJEE JUNIOR COLLEGE, HYDERABAD	97.0%	
APRIL 2015	ICSE	JOHNSON GRAMMAR SCHOOL(ICSE), HYDERABAD	95.7%	

ACADEMIC ACHIEVEMENTS

- Received the **Best Paper Award** at the IEEE Conference on Communication Systems and Networks (COMSNETS) 2022 for the Graduate Forum event.

- Received the **Nilanjan Ganguly Memorial Award** and an Endowment prize of Rs 10,000 for the **best bachelor thesis** in my cohort at E&EC Department, IIT Kharagpur for the session 2020-21.

- Received the IEEE International Symposium of Information Theory (ISIT) 2022 Student Travel Award to support my travel to Helsinki, Finland, where I presented a conference paper.

- Received FIITJEE Gold Medal and a reward of Rs 2,00,000 for securing All India Ranks 1479 and 884 in the JEE Mains and Advanced 2017 exams where over one million students applied.

- Received a state top hundred certificate for the INPhO(Indian National Physics Olympiad) 2016 and INChO(Indian National Chemistry Olympiad) 2016.

- Secured second at the city level of the Zonal Informatics Olympiad 2017 and qualified for the National Informatics Olympiad 2017.

Feel free to contact me if you are interested in looking at the work still to be published or the extended versions of the already published ones.

PROFESSIONAL SERVICE

- Reviewer for the IEEE Information Theory Workshop (ITW) 2022 conference.

- Reviewer for the Quantum Science and Technology journal by IOPscience since March 2022.

RESEARCH EXPERIENCE

MAY 2021 - OCT 2021	**SINGLETON BOUNDS FOR EACQ ERROR CORRECTING CODES**
	Guide: Prof. Andreas Winter | UNIVERSITAT AUTÒNOMA DE BARCELONA, SPAIN
	Designed a generalised communication model for Entanglement-Assisted Classical and Quantum Information, allowing catalysis(recycling) of *qbits*, *cbits* and *ebits*.
	Using information theoretic deductions, found a converse system of inequalities for these resources.
	By specialising the converse to erasure channels we got a triple-trade-off Singleton bound region, that supersedes all the previously known Singleton bounds.
DEC 2020 - MAY 2021	**COVERT COMMUNICATION OVER QUANTUM CHANNELS**
	Guide: Prof. Ligong Wang | CNRS, FRANCE
	Looked at a communication problem (communication without detection)covert communication. Studied its implementation and performance over classical channels and classical quantum channels. Currently, investigating the throughput over pure quantum channels.
MAY 2020 - NOW	**SECURITY AND PRIVACY - COMMITMENT PROBLEM**
	Guide: Prof. Amitalok J Budkeley | IIT KHARAGPUR, INDIA
	Studied information theoretic security primitives **Bit-Commitment** and **Oblivious Transfer**.
	Information theoretically derived the communication capacity limits for commitment over general discrete memoryless channels with certain cost constraints. Further developed a dual formulation of the same capacity limit.
	Studied different unreliable noise models *Compound Binary Symmetric Channels, Unfair Noisy Channels, Elastic Channels* and *Reverse Elastic Channels*. Found the commitment capacity and observed the interplay between different forms of unreliability.
	Studying commitment over quantum channels in a post quantum setting
JAN 2020 - JUN 2020	**OPTIMIZING CODES FOR PEAK AGE OF INFORMATION**
	Guide: Prof. Amitalok J Budkeley | IIT KHARAGPUR, INDIA
	Employed the Random arrival process theory to get a probabilistic expression for the metrics 'Peak age of Information' and 'Age of Information'. For **Markov sources**, obtained a closed form expression using matrix manipulations.
	Designing a source code to optimise that metric. Comparing this with other standard source coding schemes.

TALKS AND POSTERS

- Gave a series of seminar talks (virtually) on "Classical Verification of Quantum Computations" to *Prof. Rahul Jain*'s group at *Centre for Quantum Technologies (CQT), National University of Singapore.* [Scribe] [Notes]

- Gave an invited talk on my thesis topic "On Unconditionally Secure Commitment over Unreliable Noisy Channels" at Technische Universität München, Munich where I was hosted by *Dr Christian Deppe* and *Dr Holger Boche*.

- Presented a paper on "Singleton bounds for entanglement assisted classical-quantum error correcting codes" at *IEEE International Symposium on Information Theory (ISIT) 2022* conference at Helsinki, Finland.

- Presented a poster (virtually) on "Singleton bounds for entanglement assisted classical quantum error correcting codes" at *Quantum Information Processing (QIP) 2022* conference. [Poster]

- Presented my masters thesis "On Unconditionally secure commitment over unreliable noisy channels" at Graduate Forum of *IEEE Conference for Communications and Network Systems (COMSNETS) 2022* conference.
  🏆 Received the **Best Paper Award**

- Presented a poster (virtually) on "Role of Costs in Commitment over Noisy Channels" at *IEEE North American School of Information Theory (NASIT) 2021.* [Poster]

- Presented a paper (virtually) on "Commitment Capacity under Cost Constraints" at *IEEE International Symposium on Information Theory (ISIT) 2021* Conference. [short video] [long video]

- Presented a poster (virtually) on "Commitment over Unreliable channels" with Pranav Joshi and Anuj K Yadav at *IEEE International Symposium on Information Theory (ISIT) 2021* conference.

Teaching

- Teaching Assistant for the laboratory course, EC39006 *Digital Signal Processing Lab*, Spring 2022, IIT Kharagpur.

- Teaching Assistant for the theory course, EC60083 *Information Theory and Coding Techniques*, Autumn 2021, IIT Kharagpur.

Technical Skills

Programming Languages:	C, C++, C#,Javascript, Python, Verilog
Libraries/Frameworks:	PyTorch, Flask, Qiskit
Software:	MATLAB, Xilinx, Unity Game Egnine, EasyEDA, EdSim51

Relevant Coursework

complete list here

Mathematics:	Matrix Algebra, Probability & Stochastic Processes, Operations Research
Computer Science:	Algorithms, Algorithmic Game Theory, Computational Number Theory, Foundations of Computer Science, Computational Complexity, Approximation & Online Algorithms, Computer Architecture & Operating Systems, Neural Networks & Applications
Electronics & Communication:	Information Theory & Coding Techniques, Linear Algebra & Error Control Techniques, Modern Digital Communication Techniques, Mobile Communication and Fading, Digital Voice & Picture communication, Telecommunication Switching Networks, Machine Intelligence & Expert Systems, Digital Signal Processing
Physics:	Quantum Mechanics & Quantum Computing

Extra curricular activities

- Executive Editor at The Scholars' Avenue, a campus media body at IIT Kharagpur.

- Secured BRONZE in the Cartooning event of the Inter Hall General Championship 2020, IIT Kharagpur

- Volunteer at the National Service Scheme (NSS) between 2017-19. We taught in primary schools and helped construct public toilets in rural India.
